

NISHANT GAWADE

Leeds, UK (Open to Relocation) | +44 7554 729920 | nishantgawade02@gmail.com | LinkedIn Profile
Graduate Business Analyst | Business Development Research | Commercial Insight & Market Analysis

Professional Summary

Results-driven Business Analytics postgraduate with proven experience delivering structured research, competitive analysis, and data-driven insight to support strategic decision-making. Skilled in translating complex datasets into concise, commercially focused reports and presentations for senior stakeholders. Proficient in Excel (Advanced), Power BI, SQL, R, and Python for market research, trend analysis, and prospect profiling. Demonstrated ability to manage end-to-end research projects independently, maintain structured documentation, and communicate findings with clarity and precision.

Core Competencies

Research & Commercial Analysis

Market Research & Competitor Analysis, Business Development Support, Prospect Profiling & Segmentation, Stakeholder Reporting, Data Cleaning & Documentation, Strategic Insight Synthesis, Presentation Design

Technical Ecosystem

Excel (Advanced: Power Query, Pivot Tables), Power BI (Dashboards), SQL, Python (Pandas, Scikit-learn), R (Statistical Modelling), Google Sheets, Microsoft Office Suite

Research & Analytical Projects

Consumer Behavior & Monetisation Strategy Research

Apr 2025 – Aug 2025

Dissertation Project — University of Leeds, UK

Grade: Distinction

- **Designed and executed a primary research study** investigating the relationship between digital media consumption behaviour and in-market spending, using structured survey data from 72 participants.
- **Profiled and segmented target audiences** using K-means clustering and regression analysis in Python, identifying distinct consumer groups to inform differentiated commercial outreach strategy.
- **Produced a structured research report** translating complex statistical findings into clear, actionable commercial recommendations — demonstrating direct applicability to business development and growth planning.

Hotel Review Sentiment Analysis — Customer Intelligence Research

Jan 2025 – Apr 2025

University of Leeds, UK

- **Conducted qualitative-to-quantitative research** by analysing 2,000+ unstructured customer reviews, extracting themes on satisfaction drivers and competitive service gaps.
- **Applied NLP techniques** (TF-IDF, lemmatisation, tokenisation in R) to systematically process large volumes of unstructured data into structured, decision-ready insight.
- **Delivered a strategic debrief report** with clearly prioritised recommendations for customer experience improvement, mirroring the output expectations of a commercial research analyst role.

ICO Fundraising Success Prediction — Investment Risk Research

Feb 2025 – Apr 2025

University of Leeds, UK

- **Researched and profiled 6,000+ investment projects**, identifying key variables influencing fundraising outcomes to support risk assessment and opportunity evaluation.
- **Standardised data quality** across a large, heterogeneous dataset through outlier handling, feature engineering, and normalisation, ensuring research integrity.
- **Synthesised findings into a structured analytical report**, highlighting the most commercially significant success drivers — XGBoost model achieved AUC of 0.71 across 5-fold cross-validation.

US Personal Consumption Expenditures — Demand Trend Forecasting

Jan 2025 – Apr 2025

University of Leeds, UK

- **Researched and modelled macroeconomic demand trends** using time-series forecasting in R, comparing ARIMA, ETS, and benchmark approaches to identify optimal market signals.
- **Visualised a 12-month consumption forecast** via Power BI dashboards, enabling clear communication of trend insights to support strategic planning and resource allocation decisions.

Work Experience

Data Analyst (Part-time)

Jan 2021 – Jul 2023

Venus Tours, Mumbai, India

- **Engineered Power BI dashboards** using DAX measures to track KPIs across 15+ marketing campaigns, cutting monthly reporting time by 20%.
- **Analysed customer engagement** and campaign performance in Excel and Power BI, improving client reach by 28%.
- **Consolidated and cleaned multi-source datasets** across social media platforms and survey tools, improving reporting accuracy across all campaigns.

- **Modelled customer behaviour and satisfaction data** to inform event personalisation strategies, raising satisfaction scores by 25%.
- **Worked within a 5-person team** to align data insights with communication strategy, increasing online visibility by 35%.
